

# Administration of Medicines Policy

**Approved by:** J. Lucas  
**Last reviewed on:** January 2026  
**Next review due by:** January 2027

**Date:** 30.01.2026

## **CONTENTS**

1. [Legal framework](#)
2. [Roles and responsibilities](#)
3. [Training staff](#)
4. [Receiving, storing and disposing of medication](#)
5. [Administering medication](#)
6. [Medical devices](#)
7. [Health Care Plans \(HCPs\)](#)
8. [Educational trips and visits](#)
9. [Medical emergencies](#)
10. [Monitoring and review](#)

## **APPENDICES**

1. Request for school to Administer Medicine
2. Administering Medicine Sheet
3. Asthma Form
4. First Aid medicine Schedule

Layton Primary School will ensure that pupils with medical conditions receive appropriate care and support at school, in order for them to have full access to education and remain healthy. This includes the safe storage and administration of pupils' medication.

The school is committed to ensuring that parents feel confident that we will provide effective support for their child's medical condition, and make the pupil feel safe whilst at school.

For the purposes of this policy, "**medication**" is defined as any prescribed or over the counter medicine, including devices such as asthma inhalers and adrenaline auto-injectors (AAIs). "**Prescription medication**" is defined as any drug or device prescribed by a doctor. "**Controlled drug**" is defined as a drug around which there are strict legal controls due to the risk of dependence or addiction, e.g. morphine.

## 1. Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Health and Safety at Work etc. Act 1974
- Equality Act 2010
- Children and Families Act 2014
- DfE 'Supporting pupils at school with medical conditions'
- DfE 'Early years foundation stage (EYFS) statutory framework'
- DfE 'Automated external defibrillators (AEDs): a guide for maintained schools and academies'

This policy operates in conjunction with the following school policies:

- Child Protection and Safeguarding Policy
- Health and Safety Policy
- Infection Control Policy
- Supporting Pupils with Medical Conditions Policy
- First Aid Policy
- Allergen and Anaphylaxis Policy
- Complaints Procedures Policy

## 2. Roles and responsibilities

The governing board is responsible for:

- The implementation of this policy and procedures, and all corresponding procedures.

- Ensuring that this policy, as written, does not discriminate on any grounds, including the protected characteristics as defined by the Equality Act 2010.
- Ensuring that there is a sufficient number of trained staff available within the school to administer medication based upon the school's risk assessments.
- Ensuring the correct level of insurance is in place for the administration of medication.
- Ensuring that members of staff who administer medication to pupils, or help pupils self-administer, are suitably trained and have access to information needed.
- Ensuring that relevant health and social care professionals are consulted in order to guarantee that pupils taking medication are properly supported.
- Managing any complaints or concerns regarding this policy, the support provided to pupils, or the administration of medication in line with the school's Complaints Procedures Policy.

The headteacher is responsible for:

- The day-to-day implementation and management of this policy and relevant procedures.
- Ensuring that appropriate training is undertaken by staff members administering medication.
- Ensuring that staff members understand the local emergency services' cover arrangements and that the correct information is provided for the navigation system.
- Organising another appropriately trained individual to take over the role of administering medication in case of staff absence.
- Ensuring that all necessary risk assessments are carried out regarding the administration of medication, including for school trips and external activities.

All staff are responsible for:

- Adhering to this policy and supporting pupils to do so.
- Carrying out their duties that arise from this policy fairly and consistently.

Parents are responsible for:

- Keeping the school informed about any changes to their child's health.
- Completing a Request for school to Administer Medicine form prior to them or their child bringing any medication into school.
- Discussing medication with their child prior to requesting that a staff member administers the medication.

It is both staff members' and pupils' responsibility to understand what action to take during a medical emergency, such as raising the alarm or other members of staff. This may include staff administering medication to the pupil involved.

### **3. Training staff**

The headteacher will ensure that a sufficient number of staff are suitably trained in administering medication. Most staff will undergo basic training on the administering of medication to ensure that, if exceptional circumstances arise where there is no designated administrator of medication available, pupils can still receive their medication from a trained member of staff. The headteacher will also ensure that a sufficient number of staff have been trained in administering medication in an emergency by a healthcare professional.

Staff will be advised not to agree to taking on the responsibility of administering medication until they have received appropriate training and can make an informed choice. The school will ensure that, as part of their training, staff members are informed that they cannot be required to administer medication to pupils, and that this is entirely voluntary, unless the supporting of pupils with medical conditions is central to their role within the school, e.g. the school nurse.

Training will also cover the appropriate procedures and courses of action with regard to the following exceptional situations:

- The timing of the medication's administration is crucial to the health of the child
- Some technical or medical knowledge is required to administer the medication
- Intimate contact with the pupil is necessary

Staff members will be made aware that if they administer medication to a pupil, they take on a legal responsibility to do so correctly; therefore, staff will be encouraged not to administer medication in the above situations if they do not feel comfortable and confident in doing so, even if they have received training.

#### **Training for administering AAls**

The school will arrange specialist training for staff on an annual basis where a pupil in the school has been diagnosed as being at risk of anaphylaxis. Designated staff members with suitable training and confidence in their ability to use AAls will be appointed to administer this medication. As part of their training, education support staff members will be made aware of:

- How to recognise the signs and symptoms of severe allergic reactions and anaphylaxis.
- Where to find AAls in the case of an emergency.
- How to respond appropriately to a request for help from another member of staff.
- How to recognise when emergency action is necessary.
- Who the designated staff members for administering AAls are.
- How to administer an AAI safely and effectively in the event that there is a delay in response from the designated staff members.
- How to make appropriate records of allergic reactions.

There will be a sufficient number of staff who are trained in and consent to administering AAls on site at all times.

## 4. Receiving, storing and disposing of medication

### Receiving prescribed medication from parents

The parents of pupils who need medication administered at school will be sent a Request for school to Administer Medicine form to complete and sign; the signed consent form will be returned to the school and appropriately filed before staff can administer medication to pupils under the age of 16. A signed copy of the parental consent form will be kept with the pupil's medication, and no medication will be administered if this consent form is not present. Consent obtained from parents will be renewed annually.

The school will store a reasonable quantity of medication, e.g. a maximum of four weeks' supply at any one time. Aspirin will not be administered unless the school has evidence that it has been prescribed by a doctor.

Parents will be advised to keep medication provided to the school in the original packaging, complete with instructions, as far as possible, particularly for liquid medications where transfer from the original bottle would result in the loss of some of the medication on the inside of the bottle. This does not apply to insulin, which can be stored in an insulin pen.

### Storing pupils' medication

The school will ensure that all medications are kept appropriately, according to the product instructions, and are securely stored. Medication that may be required in emergency circumstances, e.g. asthma inhalers and AAI's, will be stored in a way that allows it to be readily accessible to pupils who may need it and can self-administer, and staff members who will need to administer them in emergency situations. All other medication will be stored in a place inaccessible to pupils, e.g. a locked cupboard.

The school will ensure that pupils know where their medication is at all times and are able to access them immediately, e.g. by ensuring that the identities of any key holders to the storage facilities are known by these pupils.

Medication stored in the school will be:

- Kept in the original container alongside the instructions for use.
- Clearly labelled with:
  - The pupil's name.
  - the name of the medication.
  - The correct dosage.
  - The frequency of administration.
  - Any likely side effects.
  - The expiry date.
- Stored alongside the accompanying administering medication parental consent form.

Medication that does not meet the above criteria will not be administered.

## **Disposing of pupils' medication**

The school will not store surplus or out-of-date medication. Where medication and/or its containers need to be returned to the pupils' doctor or pharmacist, parents will be asked to collect these for this purpose.

Needles and other sharps will be disposed of safely and securely, e.g. using a sharps disposal box.

## **5. Administering medication**

Medication will only be administered at school if it would be detrimental to the pupil not to do so. Only suitably trained members of staff will administer controlled drugs. Staff will check the expiry date and maximum dosage of the medication being administered to the pupil each time it is administered, as well as when the previous dose was taken.

Medication will be administered in a private, comfortable environment and, as far as possible, in the same room as the medication is stored; this will normally be the school nurse's office. The room will be equipped with the following provisions:

- Arrangements for increased privacy where intimate contact is necessary
- Facilities to enable staff members to wash their hands before and after administering medication, and to clean any equipment before and after use if necessary
- Available PPE for use where necessary

Before administering medication, the responsible member of staff should check:

- The pupil's identity.
- That the school possesses written consent from a parent.
- That the medication name, dosage and instructions for use match the details on the consent form.
- That the name on the medication label is the name of the pupil being given the medication.
- That the medication to be given is within its expiry date.
- That the pupil has not already been given the medication within the accepted frequency of dosage.

If there are any concerns surrounding giving medication to a pupil, the medication will not be administered and the school will consult with the pupil's parent or a healthcare professional, documenting any action taken.

If a pupil cannot receive medication in the method supplied, e.g. a capsule cannot be swallowed, written instructions on how to administer the medication must be provided by the pupil's parent, following advice from a healthcare professional.

Where appropriate, pupils will be encouraged to self-administer under the supervision of a staff member, provided that parental consent for this has been obtained. If a pupil refuses to take their medication, staff will not force them to do so, but will follow the procedure agreed upon in their IHPs, and parents will be informed so that alternative options can be considered.

The school will not be held responsible for any side effects that occur when medication is taken correctly.

Written records will be kept of all medication administered to pupils, including the date and time that medication was administered and the name of the staff member responsible (see Appendix 2 [Administering Medicine Sheet](#)).

Records will be stored in accordance with the Records Management Policy.

### Non-prescription medicines

The school is aware that pupils may, at some point, suffer from minor illnesses and ailments of a short-term nature, and that, in these circumstances, health professionals are likely to advise parents to purchase over the counter medicines, for example, paracetamol and antihistamines.

The school will work on the premise that parents have the prime responsibility for their child's health and should provide schools and settings with detailed information about their child's medical condition as and when any illness or ailment arises.

To support full attendance the school will consider making arrangements to facilitate the administration of non-prescription medicines following parental request and consent.

Pupils and parents will not be expected to obtain a prescription for over-the-counter medicines as this could impact on their attendance and adversely affect the availability of appointments with local health services due to the imposition of non-urgent appointments being made.

If a pupil is deemed too unwell to be in school, they will be advised to stay at home or parents will be contacted and asked to take them home.

When making arrangements for the administration of non-prescription medicines the school will exercise the same level of care and caution, following the same processes, protocols and procedures as those in place for the administration of prescription medicines.

The school will also ensure that the following requirements are met when agreeing to administer non-prescription medicines.

- Non-prescription medicines will not be administered for longer than is recommended. For example, most pain relief medicines, such as ibuprofen and paracetamol, will be recommended for three days use before medical advice should be sought. Aspirin will not be administered unless prescribed.
- Parents will be asked to bring the medicine in, on at least the first occasion, to enable the appropriate paperwork to be signed by the parent and for a check to be made of the medication details.
- Non-prescription medicines must be supplied in their original container, have instructions for administration, dosage and storage, and be in date. The name of the child can be written on the container by an adult if this helps with identification.

### Paracetamol

The school is aware that paracetamol is a common painkiller that is often used by adults and children to treat headaches, stomach ache, earache, cold symptoms, and to bring down a high temperature; however, it also understands that it can be dangerous if appropriate guidelines are not followed and recommended dosages are exceeded.

The school is aware that paracetamol for children is available as a syrup from the age of 2 months; and tablets (including soluble tablets) from the age of 6 years, both of which come in a range of strengths.

The school understands that children need to take a lower dose than adults, depending on their age and sometimes, weight. The school will ensure that authorised staff are fully trained and aware of the NHS advice on how and when to give paracetamol to children, as well as the recommended dosages and strength.

Staff will always check instructions carefully every time they administer any medicine, whether prescribed or not, including paracetamol.

The school will ensure that they have sufficient members of staff who are appropriately trained to manage medicines and health needs as part of their duties.

The written consent of parents will be required in order to administer paracetamol to pupils.

## **6. Medical devices**

### **Asthma inhalers**

The school will allow pupils who are capable of carrying their own inhalers to do so, provided that parental consent for this has been obtained (see Appendix 3 Asthma Form). Otherwise, pupil inhalers are kept securely in every pupil's classroom, and carried with the pupil if education is provided elsewhere on the school site. The school will ensure that spare inhalers for pupils are kept safe and secure in preparation for the event that the original is misplaced, unavailable or not working.

### **AAIs**

Pupil AAIs are kept securely in every pupil's classroom, and carried with the pupil if education is provided elsewhere on the school site. The school will ensure that spare AAIs for pupils are kept safe and secure in preparation for the event that the original is misplaced, unavailable or not working.

Spare AAIs are not located more than five minutes away from where they may be required. The emergency AAIs can be found at the following locations:

- **KS1 First Aid room (Year 1 classroom)**
- **KS2 First Aid room**

There will be a stock of AAIs, that are replenished when used, within locations where there is a greater risk of anaphylaxis occurring, e.g. the dining hall. The school will ensure that risk assessments regarding the use and storage of AAIs on the premises are conducted and up-to-date.

Medical authorisation and parental consent will be obtained from all pupils believed to be at risk of anaphylaxis for the use of spare AAIs in emergency situations. The spare AAIs will not be used on pupils who are not at risk of anaphylaxis or where there is no parental consent. Where consent and authorisation has been obtained, this will be recorded in the pupil's IHP.

Pupils' and spare AAIs will be obtained, stored and administered in line with the school's Allergen and Anaphylaxis Policy.

## **7. Health Care Plans (HCPs)**

For pupils with chronic or long-term conditions and disabilities, an HCP will be developed in liaison with the pupil, their parent, the headteacher, the SENCO and any relevant medical professionals. When deciding what information should be recorded on an HCP, the following will be considered:

- The medical condition and its triggers, signs, symptoms and treatments
- The pupil's resulting needs, such as medication, including the correct dosage and possible side effects, medical equipment, and dietary requirements
- The specific support needed for the pupil's educational, social and emotional needs
- The level of support needed and whether the pupil will be able to take responsibility for their own health needs
- The type of provision and training that is required, including whether staff can be expected to fulfil the support necessary as part of their role
- Which staff members need to be aware of the pupil's condition
- Arrangements for receiving parental consent to administer medication
- Separate arrangements which may be required for out-of-school trips and external activities
- Which staff member can fulfil the role of being a designated, entrusted individual to whom confidentiality issues are raised
- What to do in an emergency, including whom to contact and contingency arrangements
- What is defined as an emergency, including the signs and symptoms that staff members should look out for

The governing board will ensure that HCPs are reviewed at least annually. HCPs will be routinely monitored throughout the year by a designated staff member.

## **8. Educational trips and visits**

In the event of educational trips and visits which involve leaving the school premises, medication and medical devices will continue to be readily available to staff and pupils. This may include pupils carrying their medication themselves, where possible and appropriate, e.g. for asthma inhalers.

If the medication is of a type that should not be carried by pupils, e.g. capsules, or if pupils are very young or have complex needs that mean they cannot self-administer, the medication will be carried by a designated staff member for the duration of the trip or activity.

There will be at least one staff member who is trained to administer medication on every out-of-school trip or visit which pupils with medical conditions will attend. Staff members will ensure that they are aware of any pupils who will need medication administered during the trip or visit, and will ensure that they know the correct procedure, e.g. timing and dosage, for administering their medication.

If the out-of-school trip or visit will be over an extended period of time, e.g. an overnight stay, a record will be kept of the frequency at which pupils need to take their medication, and any other information that may be relevant. This record will be kept by a designated trained staff member who is present on the trip and can manage the administration of medication.

All staff members, volunteers and other adults present on out-of-school trips and visits will be made aware of the actions to take in a medical emergency related to the specific medical needs and conditions of the pupil, e.g. what to do if an epileptic pupil has a seizure.

## **9. Medical emergencies**

Medical emergencies will be handled in line with the First Aid Policy.

For all emergency medication stored by the school, the school will ensure it is readily accessible to staff and the pupil who requires it, and is not locked away. For all emergency medication kept in the possession of a pupil, e.g. AAs, the school will ensure that pupils are told to keep the appropriate instructions with the medication at all times. A spare copy of these instructions will be kept by the school in the school nurse's office.

## **10. Monitoring and review**

This policy will be reviewed annually by the governing board and headteacher.

Records of medication administered on the school premises, or on school trips and visits, will be monitored, and the information recorded will be used to improve school procedures.

Staff members trained in administering medication will routinely recommend any improvements to the procedure. The school will also seek advice from any relevant healthcare professionals as deemed necessary. Any changes made to this policy will be communicated to the relevant stakeholders, including pupils whose medication is stored at school and their parents.

**REQUEST FOR SCHOOL TO ADMINISTER MEDICATION**

This form must only be completed by the parent/carer in order for the request to be reviewed and subsequently administered by a authorised staff member. Those authorised to administer medicine will use the information you have provided so please ensure it is clear and accurate. This information will be held securely and confidentially.

Child's name	Class:
--------------	--------

Medical condition/illness:
----------------------------

Medication name and strength:
-------------------------------

Medication formula (IE: pills, liquid):
---

Dosage to be given:	At what time:
---------------------	---------------

Storage (IE: fridge): Does the medicine need to go home at the end of the day:  <i>Please note that if the medicine is returning home each day, please drop off and pick up at class or if applicable Breakfast/After School club</i>
--

Any instructions for administering (IE: likes it with juice):
---

Do you know of any side effects:

**TERMS AND CONDITIONS**

I, (Print name of completing form):
-------------------------------------

- (i) Request to school administering this medication as detailed and in accordance with the prescribed instructions as I have detailed.
- (ii) Have provided up to date and accurate information.
- (iii) Will inform the school in writing of any changes to this information and subsequent instructions.
- (iv) Accept that employees administering the medicine are authorised to do so by the Senior Leadership Team but are not medically trained or qualified in any way.
- (v) Agree the same existing pupil details held by school will be used IE: GP details, emergency contacts etc and that these details I have provided to the school office at up to date.
- (vi) Accept that school cannot be held responsible for the loss, damage or injury when undertaking agreed administration of the medicine unless resulting from their negligence.
- (vii) Accept the school's policy and procedure for the delivery and return of medication.
- (viii) Will provide adequate supplies of the medication that is within the expiry date.

## First Aid Medicine Schedule

1. Prescribed medicine will be brought into reception and a 'Request to Administer Medication' will be completed by the parent/ carer.

2. Once the form is completed a copy will be passed to the relevant First Aider (Side A) in the child's year group. Side A will stay with the First Aider and will be signed on receipt by the First Aider.

3. Once signed on receipt by the First Aider, Side B must be retained by the office and scanned to Reception Drive/ Children/ Medical.

4. The First Aider will store the medicine properly as per instructions and give it to the child at the proposed time.

5. The First Aider is to ensure, if required, the medicine goes home with the child. The medicine can then pass to the First Aider via the classroom (or extended schools) at the start and end of the day.

6. When administering the medicine, ensure that the Medicine Administering sheet is completed.

7. When the course of medicine is completed, the First Aider must destroy the 'Request for School to Administer' form or return to the office for shredding. The Medicine Administering sheet is to be given to the office so that they can store/archive accordingly. Any unused medicine, bottles/ packaging returned home.

8. Long term medicine that is to be administered in school that is not part of a Healthcare Plan, paperwork must be kept in the file in the relevant section - Long Term Medicine. Once course is completed, follow section 7.

9. Any Healthcare Plans will be kept in the First Aid file for as long as the Care Plan is viable. Medicines that are to be administered as part of this plan, must still be completed on the 'Medicine Administering' sheet in the relevant file section

At all times medicines, First Aid information pertaining to children should be stored away safely. The First Aid room should always be locked when not in use.

This file will be maintained by the school office. Any queries see to the office.
